D

D

1. Edges are ground smooth and eased by hand to R0.8 mm. The square eased edge is the only edge profile offered.
2. Outside corners rounded to R9 [$\approx 3/8$ "] as standard ("dime radius").
3. Custom corner radii available. State the radius on the quote request.
4. L-shapes are made in one piece or in sections, decided case by case by the overall size.
5. Where an L-shape is made in sections, the pieces are butted tight together at a seam (detail D).
